DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 1-11 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

3. In claim 1, lines 1-2, the phrase "or other instructive luminaire" renders the claim indefinite because it is unclear whether the limitations following the phrase are part of the claimed invention. See MPEP § 2173.05(d). On line 5, the phrase "such as" renders the claim indefinite because it is unclear whether the limitations following the phrase are part of the claimed invention. See MPEP § 2173.05(d).

In claim 2, line 2, and claim 5, line 2, there is no antecedent basis for "the second end".

In claim 11, line 2, the phrase "such as" renders the claim indefinite because it is unclear whether the limitations following the phrase are part of the claimed invention. See MPEP § 2173.05(d). Also on line 2, the phrase "or other instructive luminaire" renders the claim indefinite because it is unclear whether the limitations following the phrase are part of the claimed invention. See MPEP § 2173.05(d).

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

Art Unit: 3611

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 1-11 are rejected under 35 U.S.C. 102(b) as being anticipated by Esslinger et al.

Esslinger discloses a lighting fixture having a mounting housing **14** that has a light source and a power supply therein. A sign part **20** is arranged for securing in connection with the mounting housing. The lighting fixture further includes at least one optical fiber **5** arranged to transmit light, a first end of which is arranged in connection with the light source in the mounting housing and whose light-transmitting portion is arranged in connection with the sign part.

Regarding claims 7 and 8, the sign part and the mounting housing are attached to each other via the optical fibers. See Fig. 6.

Regarding claims 9 and 10, the word "luminous" means "emitting light," which is clearly something that the sign part does.

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
